#### Description

I recently ran an HTML validity check and found some HTML/CSS errors which turned out to be caused by Wt: errors.png

I ran the test with one of my applications, but it can easily be reproduced with any application, like the Wt homepage: see <https://validator.w3.org/nu/?doc=https%3A%2F%2Fwebtoolkit.eu>. (The Wt homepage itself has some more issues, but those don't seem to be automatically generated HTML/CSS.)

- The first two errors are caused because Wt does not recognize <link> and <meta> as self closing tags in DomElement::isSelfClosingTag.
- The cursor: hand CSS error occurs on multiple occasions and is always preceded by cursor: pointer, and thus looks like the result of a failed find and replace operation to me.

I already fixed those errors and created a pull request for it: <https://github.com/emweb/wt/pull/192>. Although most browsers handle these errors pretty well, I think it is preferable to not have them in the first place.

#### History

##### #1 - 06/23/2022 05:44 PM - Roel Standaert

- Status changed from New to Resolved

- Assignee set to Steven Köhler

##### #2 - 06/23/2022 05:44 PM - Roel Standaert

- Target version set to 4.8.0

##### #3 - 06/28/2022 12:02 PM - Roel Standaert

- Target version changed from 4.8.0 to 4.7.3

##### #4 - 06/28/2022 12:29 PM - Roel Standaert

- % Done changed from 0 to 100

##### #5 - 07/08/2022 11:48 PM - Roel Standaert

- Status changed from Resolved to Closed
