

Wt - Bug #10871

Bootstrap 5 Forms with floating labels are not correctly rendered with progressive-bootstrap=true

08/26/2022 02:10 PM - Stefan Bn

Status:	New	Start date:	08/26/2022
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	4.10.0		

Description

The small attached sample 'main.cpp' demonstrates the problem:

When using Bootstrap 5 floating labels on several form fields, the first form field is not rendered correctly. See image attached 'FloatingLabels_Bug.png'.

I figured out that this behavior depends on this flag in wt_config.xml:

```
<progressive-bootstrap>true</progressive-bootstrap>
```

When progressive-bootstrap is set to true, the bug occurs.

When progressive-bootstrap is set to false, all form fields are rendered correctly.

This refers to Wt 4.8.0 build with clang64 on Windows 10 and Firefox/Edge.

History

#1 - 09/06/2022 04:01 PM - Roel Standaert

- Target version set to 4.9.0

#2 - 10/06/2022 09:54 AM - Roel Standaert

- Target version changed from 4.9.0 to 4.10.0
