Description	
<p>I'm trying to run hangman example: it works when compiled with wthttp I have some problem with wtfcgi</p> <p>The requests like these don't work. These return empty responses: POST http://10.4.3.17/main.wt/play?wtd=njTGD4K5tmVMLpZF POST http://10.4.3.17/main.wt/highscores</p> <p>After I have modified ../wt-4.8.0/src/cgi/FCGIStream.C, the application works.</p> <pre>virtual const char *envValue(const char *name) const override { if (strcmp (name,"PATH_INFO") == 0) return nullptr; char *result = FCGX_GetParam(name, request_-->envp); if (result) return result; else return nullptr; }</pre> <p>I will have some problem with this solution ?</p> <p>Best regards.</p>
