| Description | | | |
| Dear Sirs! | | | |
| For setting a url of an item in WStandardItemModel one can use | | | |
| model->item(x,y)->setUrl("..."). The horizontal header data however cannot be accessed in this way. | | | |
| The code e.g. | | | |
| Wt::WAnchor *WA = new WAnchor("http:..", "Description", this); | | | |
| model->setHeaderData(i , boost::any(WA)); | | | |
| compiles, but application crashes. | | | |
| Is there some way to define an url of header data? | | | |
| Best, | | | |
| wlddasboot | | | |
