

Wt - Bug #1324

Positioning Issue - Wt::WDialog::positionAt()

06/15/2012 12:15 AM - Nelson Azadian

Status:	Feedback	Start date:	06/14/2012
Priority:	Normal	Due date:	
Assignee:	Koen Deforche	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
When using Wt::WDialog::positionAt() on a container widget located near the bottom of the screen, positionAt() will place the dialog at the opposite end of the screen rather than on top of the container widget (when there isn't enough room below the widget) when using a Wt::Vertical orientation - see screen shot (attached).

Pieter,

Can you make a test-case for this ?

Hey,

It's well possible that we've fixed this bug in Wt 3.2.3, could you check ?
