Description

I have a problem because when I click the button I can't see any changes on my website.

The button work but I don't see any changes.

The code is in file.

History

#1 - 06/28/2012 04:59 AM - suburgatory 29

The same problem. And it seems to me, that "WContainerWidget" could be somehow related with this. I mean if would use "clicked().connect" thing in class-or-structure that in inheritance with "WApplication", then it's gonna be ok, but if there's something else like WWidget then your "activate()" event just will be ignored.

#2 - 06/28/2012 12:11 PM - Koen Deforche

- Status changed from New to Feedback

Hey,

I don't see anything wrong with your code, but it would be useful if you could create a test case that is self-contained so I can have a look at what is going wrong ?

koen

#3 - 06/28/2012 09:42 PM - Paweł Grzybowski

- File 1main.cpp added

I sent the test case file.
