

Wt - Bug #1397

WTemplate causes JavaScript errors

08/13/2012 02:42 PM - Dietrich Casselman

Status:	New	Start date:	08/13/2012
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
WTemplate is confused when conditional statements cause fields (e.g. WLineEdit or WComboBox) to appear/disappear by modifying the conditions. The test also uses bind to reassign these widgets to the same template variable. Javascript errors that refer to non-existing objects pop up.
