| Description | |
| Hello, | |
| we have a problem with WFileUpload->fileTooLarge(). Nothing happens when uploading a file bigger then defined in wt_config.xml. The fileTooLarge()-function is not called. For smaller files everything works fine and fileupload is working correct. We tested it with Wt-3.3.0 and Wt-3.3.1-rc1. We use Apache with FCGI. | |
| Kind regards | |

Hey,

Are you sure that your larger file upload is not being blocked by Apache itself? Then Wt cannot do anything about it. You must make sure that Apache's setting is less stringent than Wt's setting.

Regards,

koen

Thanks!

Indeed the apache's setting.
