

Wt - Bug #2218

Auth Module: Lost Password Expired Token Message: Ill Formed

09/17/2013 12:11 AM - Ray .

Status:	Feedback	Start date:	09/17/2013
Priority:	Normal	Due date:	
Assignee:	Koen Deforche	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Following along with the previous message, when clicking on the link from the email again, the text in the error box is "The operation could not be completed: invalid token." However the screen isn't very readable. Please see attached screenshot. I am using the default resource file settings.

- Status changed from New to Feedback
- Assignee set to Koen Deforche
- Target version set to 3.3.1

Hey,

For these bugs, this is with Wt 3.3.0 or a 3.3.1 release candidate?

Do you get this only for small windows?

Regards,

koen

Both are with stable release 3.3.0. Viewing in FireFox 23. I would need to check again with Firefox 24. My browser window was pretty big, so browser window wasn't limiting the displayed dialogs.

- Target version changed from 3.3.1 to 3.3.2

#4 - 02/18/2014 11:27 PM - Koen Deforche

Hey,

Could you check if the problem persists with current 3.3.2 RC1?

Regards,

koen

#5 - 03/12/2014 06:14 PM - Koen Deforche

- Target version deleted (3.3.2)
