Hey,

Can you capture the last 'POST' request response body (using a tool like Firebug or Web Inspector) before you get this error?

Is this a regression from 3.3.0 ?

regards,

koen

- File *wt\_post\_errors.pcap* added

Hi Koen,

I have attached a capture file (.pcap format) that contains POST requests. The last POST request fails.

I think this is a regression from 3.3.0.

is Wt 3.3.1 still compatible with MSVC 2008 (even if it does not support C++11 ?

Thank you in advance for your help,

Best regards,

##### #3 - 09/25/2013 11:30 AM - Wim Dumon

There are no known specific problems with MSVC 2008. Wt itself does not require C++11 to compile, and the examples that use it are skipped on older compilers.

BR,

Wim.

- Status changed from Feedback to Resolved

Hey,

Thanks for the capture. This is a glitch that slipped into git (only about a week ago?). A fix is on its way!

Thank you Wim for your answer about c++11 and Koen for solving the issue.

This may also fix the strange behaviour of WTreeView with Firefox (always scroll to top).

Best regards
