Description			
<p>I deploy my app as a built-in server.</p> <p>Here I add background image to some css class:</p> <pre>wApp->styleSheet().addRule(".myClass", "background: url(clear.png)");</pre> <p>The clear.png file is located in the docroot.</p> <p>If I start my application with the --deploy-path param, my background image is not loading because my browser (Google Chrome) tries to find it using an invalid url:</p> <pre>http://localhost:10105/wt/clear.png</pre> <p>wt - is the deploy path.</p> <p>The correct url is:</p> <pre>http://localhost:10105/clear.png</pre> <p>I use Wt 3.3.1</p>
