WCheckBox in Safari: changed- Event fired twice

02/22/2014 05:17 PM - Stefan Hainzl

Status:	Closed	Start date:	02/22/2014
Priority:	Normal	Due date:	
Assignee:	Roel Standaert	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	3.3.2		
Description			
A more detailed description of how this was discovered can be found here: http://redmine.webtoolkit.eu/boards/2/topics/8484?r=8523			
.			
Abstract:			
A function that is connected to the changed signal is observed to be entered twice after the user clicked on the WCheckBox.			

History

#1 - 02/24/2014 09:37 AM - Koen Deforche

- Status changed from New to InProgress
- Assignee set to Roel Standaert
- Target version set to 3.3.2

#2 - 02/24/2014 11:55 AM - Roel Standaert

- Status changed from InProgress to Resolved

Hey,

The Safari workaround has become obsolete, causing the changed() event to be fired twice.

Regards,

Roel

I try to follow development a bit, and have a huge problem:

Issues are getting "Resolved", without any pointer to the relevant commit in the repo.

Is it possible to provide the links in future, thus following development will become easier.

(remember that this is somehow standard in open-source projects today)

#4 - 02/24/2014 04:05 PM - Koen Deforche

Hey,

Unfortunately, due to distributed nature of git, the 'repo' is actually not well defined. It's in our internal repo, but this only gets pushed to the external github repo after review.

Perhaps we can add a 'Status' state to differentiate between resolved-implemented, and resolved-available?

Regards,

koen
