<b>Target version:</b>			
<b>Description</b>			
In order to be able to map filesystem locations to URL paths, an "alias" configuration option should be provided.			
This construct would be similar to the apache Alias directive:			
<a href="http://httpd.apache.org/docs/2.2/mod/mod_alias.html#alias">http://httpd.apache.org/docs/2.2/mod/mod_alias.html#alias</a>			
<b>Implementation</b>			
by config option			
<b>Usage Example</b>			
<code>--alias="/resources /var/wt-install-dir/resources"</code>
