Description			
After upgrade from 3.2.1 to 3.3.2 WPanel title bars no longer support background-color css stylesheet directives. I used to set my WPanel background-color to match the expanded container.. now the title bar is always grey

Hey,

You should be able to override the panel's title bar background color using:

```
.Wt-panel .titlebar {  
  background-color: yellow;  
}
```

Perhaps I'm not actually understanding your problem?

Regards,
