Wt - Bug #3212

setAppRoot(): too late

05/26/2014 06:22 PM - Saif Rehman

Target version:				

Description

I start my application with ---approot "..." command. And when I call WServer::setServerConfiguration(argc, argv, WTHTTP_CONFIGURATION) to set up the WServer an error is shown "setAppRoot(): too late, already configured".

It's not fatal however it is a false error message since I never set approot before that.

Hi,

I can't seem to reproduce this. I start the hello world example with ---approot but I don't see that error. Can you put a breakpoint on that setAppRoot method and check from where it's called?

BR,

Wim.

My main.cpp

```
WServer Server = WServer(argv[0], "wt_config.xml");
try
{
    Server.Initialize();
    Server.setServerConfiguration(argc, argv, WTHTTP_CONFIGURATION); <---- HERE
    ...
}
```

in WServer.C, function void WServer::setServerConfiguration()

```
  if (!appRoot.empty())
    setAppRoot(appRoot); <--- HERE
```
