<b>Description</b>			
Hi,			
WTableView::clicked signal is emitted only on left mouse click. Here an extract of my code:			
<pre>void tableClicked(const WMouseEvent&amp; event); ... tableView-&gt;setAttributeValue("oncontextmenu", "event.cancelBubble = true; event.returnValue = false; return false;"); tableView-&gt;clicked().connect(boost::bind(&amp;tableClicked, _2));</pre>			
The rest of the code is not relevant, I suppose.			
Regards,			
Stoycho

Hey,

This report confused me too --- but that's because I forgot that indeed a browser will not report right clicks; this has nothing to do with WTableView.

(There is in fact a non-standard quite portable way of getting right mouse clicks which is the 'oncontextmenu' handler, but in practice a workaround is to simply use mouseWentUp() ?)

Regards,

koen
