

## Wt - Bug #3371

### WTableView does not call any an item delegate methods on removing rows

06/23/2014 04:28 PM - Alexander Morozov

<b>Status:</b>	Closed	<b>Start date:</b>	06/23/2014

<b>Target version:</b>	3.3.4		
<b>Description</b>			
<p>I use my class derived from WAbstractItemDelegate for creating item widgets in WTableView.</p> <p>Each widget contains WModelIndex to modify its contents when user interacts with it.</p> <p>On inserting row at beginning WTableView calls update() method of delegate for all table items.</p> <p>So delegate can update model indexes in widgets.</p> <p>But on removing row at beginning WTableView does nothing and widgets contain wrong model indexes that leads to showing wrong data after interacting with them.</p> <p>WAbstractItemDelegate contains updateModelIndex() method but it is not called by WTableView.</p> <p>I attached an example. Items contain buttons with numbers. Clicking on these buttons adds/removes [] around a number. After clicking on "Add" and after on "Remove" item buttons start to show numbers incremented by 1.</p>
