Category:	Estimated time: 0.00 hour
Target version: 3.3.4	
Description "Invite" based registration: - The administrator just enters the email of the user to invite. - The user receives a special link in the email (time validity of the link to be customized) <ul style="list-style-type: none">• The link allows the user to create its login/password account. May be integrated in Wt::Auth or implemented as an example.
