Target version:	3.3.3		
Description			
Dear Sir,			
We found some debug version library link to release version library.			
<ul style="list-style-type: none">The bin/libhpdfd.dll in Wt-3.3.3-msvs2010-Windows-x86-SDK.zip was link to zlib.dll, not zlibd.dll.			
Is this a known issue?			
Will it be fixed in the next version?			
Thanks for your help.			
Best regards,			
Dio

- Status changed from New to InProgress

That was not a known issue, thank you for reporting.

On the other hand, in my experience zlib will behave nicely wrt CRT compatibility and this should not cause a problem. Do you see any problem that needs to be urgently addressed?

Best regards,

Wim.

Dear Wim,

Thanks for your reply.

If there is any critical problem, we will get back to you asap.

Best regards,

Dio
