<b>Target version:</b>	3.3.4		
<b>Description</b>			
<p>I have a Dbo object in a Sqlite3 database with a ManyToMany relation and I'm trying to clear the collection of the relation by <code>Dbo::collection&lt;&gt;::clear()</code>. It does not work but throws an exception:</p> <pre>terminate called after throwing an instance of 'Wt::Dbo::backend::Sqlite3Exception'</pre> <pre>what(): Sqlite3: delete from "testClass" join "testRelation" on "testRelation"."testRelationPassive" = "testClass"."id" where "testRelation"."testRelationActive" = ? : near "join": syntax error</pre> <p>I'm using wt 3.3.3, sqlite3 version is 3.7.17. Note that the problem occurs regardless of the ManyToMany relation being reflexive or not.</p> <p>Maybe it's related to the following issue:</p> <p><a href="http://redmine.webtoolkit.eu/boards/2/topics/5363">http://redmine.webtoolkit.eu/boards/2/topics/5363</a></p> <p>Examples for the reflexive and the non-reflexive cases are attached.</p> <p>Regards</p> <p>Jörg</p>

Hey,

Indeed there was something wrong here, but this has been resolved since.

Koen.
