Target version:			
Description			
painting example raises exception when started with eclipse+jetty			
PaintMain cannot be found			
(see attached an exception log)			

History

#1 - 07/24/2009 03:33 PM - Pieter Libin

I can reproduce this issue by

- manually removing the bin dir in the project
- removing jwt-painting/src from the java build path (project preferences >> java build path >> source (first tab))

If this is still correct in your settings, is it possible to create an archive of the painting project, so we can check the eclipse project settings in detail.
