<b>Description</b>			
I sometimes come to this error. I use a WStackedWidget. It usually occurs after I refresh the page for about 5 times.			
Wt internal error: TypeError: Cannot read property 'setCurrent' of undefined, code: undefined, description: undefined

Hi,

Do you have any extra information? Ideally, a reproducible small test case? The Wt homepage uses a stacked widget, do you see the problem if you run that example?

Best regards,

Wim.

We recently fixed something that may explain this problem. Can you test with Wt github version?
