<b>Description</b>			
Hello,			
I have implemented a WTimeEdit class based on Wt 3.3.3.			
Because I don't currently need the corresponding Validator I have only "prepared" it.			
I might implement the regex stuff in the WTimeValidator at some point in the future (if noone else does it).			
The attached patch also includes the file "time-edit-button.png" based on the same icon set as the "date-edit-button.png" for Bootstrap 3.			
Kind regards,			
Benjamin Oldenburg
