

## Wt - Bug #3813

### Toggleing WPanel collapse state via title bar does not emit signals

02/22/2015 08:47 PM - Laurence Withers

<b>Status:</b>	Closed	<b>Start date:</b>	02/22/2015
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	3.3.4		
<b>Description</b>			
<p>It is possible to toggle the collapse state of a collapsible Wt::WPanel by clicking on either the expand/collapse icon or the title bar text. When using the icons, the expanded() and collapsed() signals are emitted. However, when using the title bar, neither of these signals are emitted.</p> <p>I do note there are expandedSS() and collapsedSS() signals, emitted under different circumstances, but not sure what those are for.</p> <p>The attached patch causes the correct expanded() or collapsed() signal to be emitted on toggling via title bar click (added in Wt::WPanel::toggleCollapse(), which is a private slot called only on title bar click).</p>			

#### History

**#1 - 03/09/2015 11:41 PM - Koen Deforche**

- Status changed from *New* to *InProgress*
- Assignee set to *Benoit Daccache*
- Target version set to *3.3.4*

**#2 - 03/10/2015 05:29 PM - Benoit Daccache**

- Status changed from *InProgress* to *Resolved*

patched tested and applied.

**#3 - 03/17/2015 08:20 AM - Koen Deforche**

- Status changed from *Resolved* to *Closed*
