#### Description

While casually browsing the Wt homepage and examples, I had several occurrences of:

Wt internal error: TypeError: Cannot set property 'innerHTML' of null, code: undefined, description: undefined.

Please see attached image for context.

I am using Chrome 41.0.2272.118 m

While this error is not an immediate problem for myself, it does not give a good impression to those using the site with a view to downloading Wt. Also, naturally, the problem may turn up in our developments.
