<b>Target version:</b>			
<b>Description</b>			
<p>Resize a WText "iframe" widget into a WGridLayout is inaccurate. A very slow mouse movement of the column separator is the only way to resize the widget.</p>			
<pre>WGridLayout *layout = new WGridLayout(); layout-&gt;addWidget(folderView(), 0, 0); layout-&gt;addWidget(new WText("&lt;iframe src='http://www.webtoolkit.eu/wt' width=\"1024\" height=\"768 \"&gt;&lt;/iframe&gt;", XHTMLUnsafeText), 0, 1); layout-&gt;setColumnResizable(0);</pre>
