<b>Description</b>	
<p>Hi there, I would like to suggest the following feature.</p> <p>Example:</p> <p>I am starting a session by calling the url "test.com/foo&amp;bar=0". Then I want to set the internal path to "app" and remove the url parameter to get a nice and clean "test.com/app".</p> <p>As far as I know this is not possible right now (for different reasons).</p> <p>I could image a function in Wt::WApplication to remove certain parameters (by changing the parameter map in WebSession-&gt;WEnvironment).</p> <p>(The issue has been described and ask for here, too: <a href="http://redmine.webtoolkit.eu/boards/2/topics/9465">http://redmine.webtoolkit.eu/boards/2/topics/9465</a>)</p>
