

## Wt - Bug #5390

### Calendar widget shows up after calling WDateEdit::setHidden(false)

11/01/2016 12:57 PM - Alan Finley

<b>Status:</b>	Feedback	<b>Start date:</b>	11/01/2016
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	André Jacobs	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	3.3.1		
<b>Description</b>			
An example:			
<pre>#include &lt;Wt/WCheckBox&gt; #include &lt;Wt/WDateEdit&gt; #include &lt;Wt/WText&gt;  using namespace Wt;  void toggle_date_edit(WCheckBox *cb, WDateEdit *de, WText *t) {     de-&gt;setHidden(!cb-&gt;isChecked());     t-&gt;setHidden(cb-&gt;isChecked()); }  Wt::WApplication* createApplication(const Wt::WEnvironment&amp; env) {     WApplication *app = new WApplication(env);     WCheckBox *cb = new WCheckBox("Show WDateEdit", app-&gt;root());      WContainerWidget *cont = new WContainerWidget(app-&gt;root());     WDateEdit *de = new WDateEdit(cont);     WText *t = new WText("some text", cont);      de-&gt;hide();     t-&gt;show();      cb-&gt;changed().connect(boost::bind(&amp;toggle_date_edit, cb, de, t));      return app; }</pre>			
After I check the "Show WDateEdit" checkbox on, a calendar widget shows up along with WDateEdit itself.

I was not able to reproduce this bug with the latest version of the master branch. Does your issue occur on a newer version as well?
