Description			
Hi, does Wt support real time data series plots as NASA OpenMCT does? [[[https://openmct-demo.herokuapp.com/]]]			

History

Wt has charts that can be updated by pushing new data from the server. This will do a full rerender of the chart, though. If you are updating a lot of charts with a lot of data in real time, then it may be a bit slow. The kind of charts in that example should be fine, because those don't have that many data points.

Take a look at the serverpush feature example ([examples/feature/serverpush](#)) to see how you can push updates to the client.
