

Wt - Feature #5748

Update wthttpd section in Features page on Wt website

06/05/2017 11:49 AM - Kayra Akman

Status:	New	Start date:	06/05/2017

Target version:			
Description			
If I am not mistaking wthttpd started to support dedicated-session feature. The Features page still claims the wthttpd (only) runs in a single process. Also Wt's web-service-related features needs a place on that page. Exposing C applications via web APIs may be of great interest for new/potential Wt.

The features page is being reworked for the new website launch. I'll make sure they're not outdated when the website goes live.
