Description			
<p>I'm really interested in Wt but I'm new to C and I am having a really hard time with installation. The Ubuntu PPA has been inactive for nearly 2 1/2 years. The official Ubuntu instructions specify using Aptitude, which no longer ships with Ubuntu and will soon be discontinued. I could use 'sudo apt install libwt*' but that installs too many packages in my system. So for now I am building everything. I have built everything successfully, but I am fussing with linker libraries, undefined references, etc. Please consider simplifying the installation process and updating the Ubuntu instructions. Thank you.</p>
