

Wt - Bug #6189

setCurrentIndex(-1) and setNoSelectionEnabled(true)

12/18/2017 10:14 PM - Bert Cuypers

Status:	New	Start date:	12/18/2017
Priority:	Normal	Due date:

Target version:			
Description			
When several linked comboboxes, which are defined in a WTemplate, are loaded with new data, they are not able to set the current index to --1. Although I regularly call setCurrentIndex(-1) in combination with setNoSelectionEnabled(true), only the first time after loading the page, the comboboxes are indeed set to an index of --1 (empty).
