<b>Description</b>			
If a WPopupMenu is attached to a WMenuItem and then the WMenuItem is removed from a callback of the popup the following error occurs:			
[error] "WContainerWidget: removeWidget(): widget not in container"			
It works fine when a WPushButton is used.

I'm facing the exact same behavior.

Besides that I noticed that with Wt4.5 the WPopupMenu stays open and will not close automatically.

With Wt 4.0.5 the WPopupMenu closes and will not stay open.
