

Wt - Bug #7196

Pango 1.44 deprecation warnings

08/14/2019 12:30 PM - Roel Standaert

Target version:	future		
Description			
Pango 1.44 deprecated <code>pango_fc_font_lock_face</code> , causing deprecation warnings when compiling <code>FontSupportPango.C</code> .			
This function being deprecated means we'll need to find an alternative for it at some point.			
Wt also does not compile with Pango 1.44.3, but Pango 1.44.4 and the patch for issue #7193 should fix that.

- Target version set to future

I have made some attempts but I have yet to find how to properly substitute our use of `pango_fc_font_lock_face`.

What doesn't work:

```
auto hbFont = pango_font_get_hb_font(font);
FT_Face face = hb_ft_font_lock_face(hbFont); // Returns null
```
