| <b>Target version:</b>  | 4.5.1    |                        |            |
| <b>Description</b>  |          |                        |            |
| This example uses <code>WDateTime::toLocalTime()</code> . The default parameter is the current locale which has no timezone, resulting in an invalid <code>WLocalDateTime</code> .<br>Perhaps the solution is to move the timezone offset stuff into <code>WLocale</code> ? |          |                        |            |
