Target version:			
Description			
<p>The WMenu is made at the start of the application and bind to the template. One of the WMenu items can be clicked and contains a listener.</p> <p>During the application the WMenu is removed with bindEmpty() en shown with bindWidget(). After re-binding the widget the WMenu is shown and the button can be click but this gives an error: decodeSignal(): signal 's26' not exposed</p>
