<b>Description</b>			
<p>I am using tab widget and want to set icon for some tab. I am setting the icon following as below. There is no error but i can't see the icon. What am i doing wrong?</p> <pre>m_homeTab = m_tabWidget-&gt;addTab(std::move(homeTabContent), tr("str.pivotHome")); m_homeTab-&gt;setIcon("resources/assets/images/snow.png");</pre> <p>Note :: The icon location is ok. I can see it in the inspect tool. And i am using 16X16 px icon.</p>

Your code seems fine. I did a quick test and for me the icon is shown. Not sure what's wrong here. Make sure the icon is 16x16 else it will overflow.
