Linking issues on Fedora 35

Description			
I'm getting this error on Fedora 35: error: '/usr/lib64/libddl.so', needed by 'wt/src/Wt/Db/backend/libwtdbosqlite3d.so.4.6.0', missing and no known rule to make it Changing the logic that we use to add libddl to libwtdbosqlite3 to simply use \${CMAKE_DL_LIBS} fixes it.
