

Wt - Bug #9615

Missing handling of drop event in WAbstractProxyModel and WStandardItemModel

01/13/2022 01:48 PM - Andreas Frolov

Status:	New	Start date:	01/13/2022
Priority:	Normal	Due date:

Target version:			
Description			
The new method			
<pre>WAbstractItemModel::dropEvent(const WDropEvent& e, DropAction action, const WModelIndex& index, Wt::Side side)</pre>			
was not reimplemented in classes WAbstractProxyModel and WStandardItemModel. I think the method is redundant but if it is already there it has to be handled correctly.
