Target version:	
Description I have a scatter chart. X use DateTime chart->axis(Wt::Chart::Axis::X).setScale(Wt::Chart::AxisScale::DateTime) I enabled setCrosshairEnabled(true); A legend appears in right top but the X is not formatted in DateTime. Is it possible to change the legend format? Regards,

Sorry, no, that's not currently supported. The formatting on the axes is done server side, while the X value of the crosshair is calculated client side, where we don't have a formatting function for that.
